

11. Quote from SCC re Pembroke Road Improvements:

Good morning, I now have the cost back for the delivery of the works on Pembroke Rd. I am sorry it has taken so long.

The Bill of Quantity is £28063.94, I'd like to allow 20% contingency as prices continue to rise and labour costs keep going up so that makes it £33676.72 and so far on design and road safety audits, we have spent £8440.16, we still need to have Road Safety Audit 3 (RSA3) once the scheme is built but that can come out of the contingency. So, in total £42116.88, though you could get some back. We can proceed and get the works booked in, but I will need the payment for the design and a confirmation from you that you will pay the total amount on works completion.

Works will take approx. 2 weeks, using temp traffic signals.

I will leave this with you to discuss with the Council, kind regards

Ju
